

Guide for Student Accessing Work

Offsite Learning

Most Basic service: Connecting from any device with Limited Internet access

- Click on browser (Chrome)
- Go to <http://simon.sjc.vic.edu.au> or College Website www.sjc.vic.edu.au and clicking in the PORTALS/Student Portal tab
- Login with **curric\username** and your password
- Be sure to use a backslash \ (**NOT** a forward slash /)

Go to Learning Areas – Find and click on your specific Class e.g. Yr. 11 Physics
Open Class Notice and refer to the work/web links the teacher has left for the day/week.

- **Watching Videos**

If you have slow/limited internet at home and will not necessarily be able to watch a video:

- Reduce the streaming quality as this will help reduce the size of any downloads but still allow you to view the resources.
- Access Powerpoints/Pdf Documents/OneNote Pages first before trying to access videos.
- If your phone plan allows you enough data you can watch videos this way and mirror onto TV's or other devices.

- **Accessing: OneNote Resources**

Before leaving school make sure you have done a Complete Sync of all your Notebooks. This will mean you can access any resources provided by your teacher even if you are offline.

Choose File Menu – Select View Sync Status

and then choose Sync all

Sync All

Alternatively, if you are able to go to a relative's house with better internet you can do a sync once a week/weekend to update your class notebook.

- **Meetings in Teams**

You will receive an email notification about the class meeting [Join Microsoft Teams Meeting](#)

When asked to join select Audio only as this will mean you can listen to the lecture without having to have a high bandwidth requirement.
